Code	Booking Editing ID	Booking Editing Line	Kode Eps	Editing Date	Editing Shift	Generated By	Generated Datetime	Login Detail Status
122135012505640	BE18020001	10	PB18014098.001	2018-02-19 00:00:00.000	2	SYSTEM REFERENCE	2021-01-05 12:35:25.640	<a href="#">View Detail</a>

- Textbox booking editing ID dan booking editing line ada peringatan jika tidak diisi seperti pada gambar, karena semua wajib isi
- Untuk textbox Booking Editing ID dalam bentuk autocomplete dari tabel transaction\_bookingediting (contoh: ketik "BE.." langsung keluar dropdown ID nya)
- Untuk Booking Editing Line dalam bentuk selectbox berelasi dengan booking editing id yang diatas diambil dari table transaction\_bookingeditingdetail
- Untuk textbox kode eps, editing date dan editing shift disabled karena autofill dari table transaction\_bookingeditingdetail berelasi dari dua field yang diatas

- Setelah form terisi, user akan klik button generate code dan akan keluar code nya seperti pada gambar

The screenshot shows the TRNS7 Log Editing interface. At the top, there is a navigation bar with 'Log Editing', 'Reference', and 'Non Reference' tabs. The 'Reference' tab is active. Below the navigation bar, there is a form titled 'Reference' with the following fields:

- Booking Editing ID:  \*Ketik Booking Editing ID
- Booking Editing Line:  \*Pilih Booking Editing Line
- Kode Eps:
- Editing Date:
- Editing Shift:

Below the form, there is a large blue button labeled 'GENERATE CODE'. Underneath the button, there is a section titled 'Your Code' with a large white box containing the generated code: 122135012505640.

Below the 'Your Code' section, there is a 'History' section with a table showing the generated code and its details.

Code	Booking Editing ID	Booking Editing Line	Kode Eps	Editing Date	Editing Shift	Generated By	Generated Datetime	Login Detail Status
122135012505640	BE18020001	10	PB18014098.001	2018-02-19 00:00:00.000	2	SYSTEM REFERENCE	2021-01-05 12:35:25.640	<a href="#">View Detail</a>

- Pola hasil code generate adalah “jam2digit-tahun2digit-menit2digitbulan2digit-detik2digit-hari2digit-miliseconds3digit” (contoh: Usergenerate code pada 2021-01-05 12:35:25.640 maka code yg tergenerateadalah ‘122135012505640’)
- Data diatas akan disimpan ke table “transaction\_logediting” dengan detail dibawah ini :
  - o logediting\_code = generatedcode,
  - o logediting\_reference\_id = booking editing ID,
  - o logediting\_reference\_line = booking editing line,
  - o logediting\_reference\_code = Kode Eps,
  - o logediting\_useddate = Editing Date,
  - o logediting\_usedshift = Editing Shift,
  - o logediting\_isreferenced = 1,
  - o logediting\_generatedby = NIK user yang login,
  - o logediting\_generateddate = date generate code,
  - o logediting\_generatedtime = time generate code,
  - o Yang lain NULL

4. Jika NIK yang login mempunyai privilege level 1 pada database dari tabel transaction\_logeditingpriviledge, maka user tersebut dapat mengakses fitur reference, fitur non reference dan logout seperti pada gambar

27	28	29	30	31	1	2
3	4	5	6	7	8	9
10	11	12	13	14	15	16
17	18	19	20	21	22	23
24	25	26	27	28	29	30
31	1	2	3	4	5	6

Editing Reason:

Booking Editing ID:

Booking Editing Line:

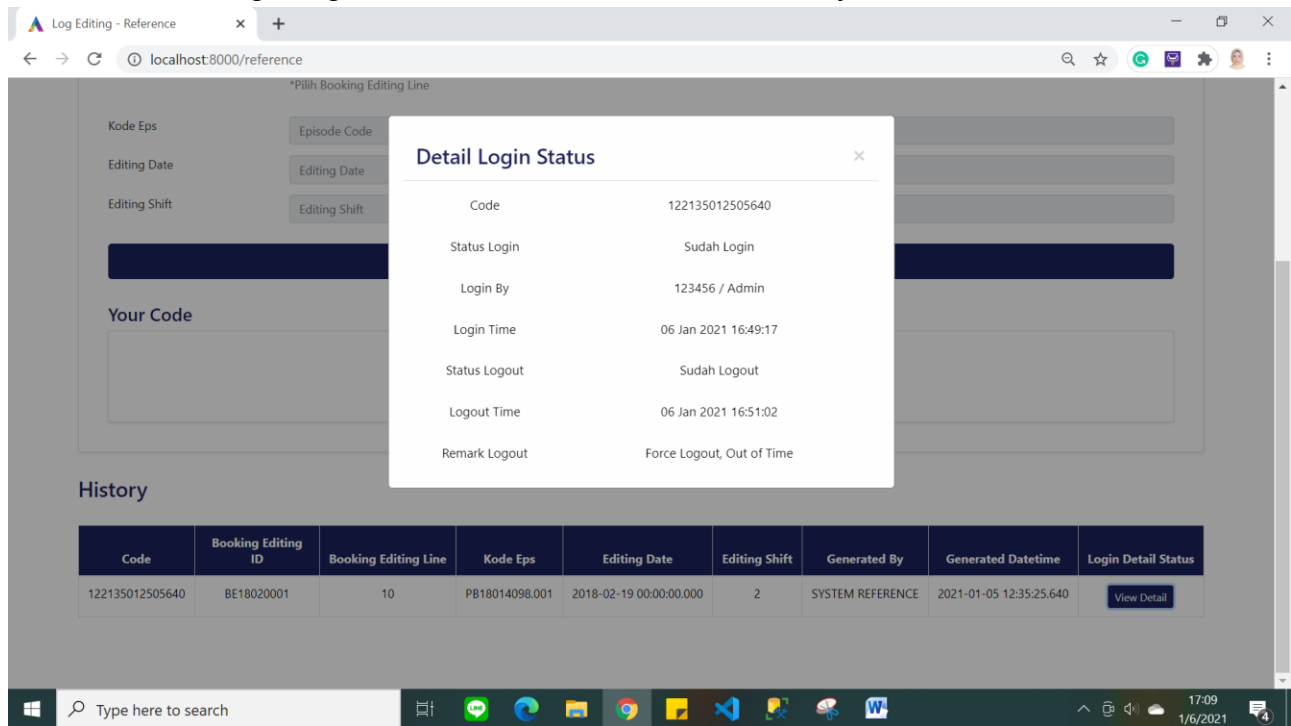

Kode Eps:

**GENERATE CODE**

Your Code:

- Fungsi hampir sama seperti Reference, tetapi pada Non Reference: editing date, editing shift, editing reason wajib isi secara manual. Kecuali booking editing id, booking editing line dan kode eps tidak wajib diisi.
- Dan untuk booking editing id, booking editing line dan kode eps diambil dari database dan saling berkaitan
- Seperti pada reference, kolom yg wajib isi akan ada peringatan jika terlewat diisi
- Pola generate code juga masih sama seperti reference
- Tabel history juga masih sama seperti reference
- Data diatas akan disimpan ke table "transaction\_logediting" juga dengan detail dibawah ini :
  - o logediting\_code = generatedcode,
  - o logediting\_reference\_id = booking editing ID,
  - o logediting\_reference\_line = booking editing line,
  - o logediting\_reference\_code = Kode Eps,
  - o logediting\_useddate = Editing Date,
  - o logediting\_usedshift = Editing Shift,
  - o logediting\_reason = Editing Reason,
  - o logediting\_isreferenced = 0,
  - o logediting\_generatedby = NIK user yang login,
  - o logediting\_generateddate = date generate code,
  - o logediting\_generatedtime = time generate code,
  - o Yang lain NULL

5. **POPUP REFERENCE DAN NON REFERENCE**-> Button pada Login Status Detail adalah fitur yang digunakan untuk melihat status “Code Access” yang sudah di generate, meliputi status “Code access” sudah login/logout, dan datetime login/logout Editor. Berikut “User Interfacenya”:

- Detail berbentuk POPUP, status login/logout (sudah apa belum) dapat diambil dari “logediting\_logindate” / “logediting\_logoutdate”, jika NULL maka belum login/logout. Berikut detail field yang ada di table yang ditampilkan pada Login Status Detail ini :
  - Code = logediting\_code
  - Status Login = logediting\_logindate
  - Login By = logediting\_loginnik / logediting\_loginname
  - Login Time = logediting\_logindate + logediting\_logintime
  - Logout = logediting\_logoutdate
  - Logout Time = logediting\_logoutdate + logediting\_logouttime
  - Remark Logout = logediting\_remark
